Subject: Microsoft Settlement

Greetings!

I'm an independent software developer, and I'm concerned that the proposed remedies for the unlawful and unethical actions of Microsoft will not be enough to put the computing field back on a level playing field. Microsoft has systematically destroyed any competition to its desktop dominance- and has hurt my customers due to the lack of a viable alternative due to their illegal actions. Please be a bit stronger in the defense of us consumers and those hurt by Microsoft. Thanks for your time. Please feel free to contact me at any time, and for any reason.

Yours,

Ben Johnson
